SUMMARY

Full-Stack Developer (MERN + Next.js) and AI Integration Engineer specializing in LLM-powered products, intelligent chat experiences, and end-to-end web platforms. Experienced in building fast, secure, production-grade applications and shipping real AI features including chatbots, generative tools, and agent architectures.

EDUCATION

Jagannath University B.Tech in Computer Science and Engineering	Jaipur, Rajasthan <i>Pursuing</i>
---	--------------------------------------

SKILLS

Full-Stack: React (19), Next.js, TypeScript, Node.js, Express, MongoDB, Mongoose, Tailwind CSS, Redux Toolkit, REST APIs

AI Integration: Groq (LLaMA 3.3), Google Gemini, Prompt Engineering, AI Chatbot Systems, Agent Architecture

Tools & DevOps: Git, GitHub, JWT/OAuth, Razorpay, Firebase, Supabase, Vercel, Render, PWA

EXPERIENCE

Emerging Technologies Intern <i>4-Week Internship (View Certificate)</i>	Edunet Foundation (AICTE & IBM SkillsBuild) <i>May 2026 – Jun 2026</i>
--	---

- Completed an intensive program focused on Agentic AI, Cyber Security, and Quantum Computing leveraging IBM Cloud and IBM BOB.
- Successfully developed and delivered an industry-relevant project integrating Artificial Intelligence and Cloud Computing.

Full-Stack Web Development Intern <i>Internship Program (View Certificate)</i>	YHills <i>Mar 2024 – Jun 2024</i>
--	--------------------------------------

- Built full-stack features across the MERN stack and Next.js utilizing TypeScript.
- Developed authentication systems, designed database schemas, and integrated REST APIs into production UI.
- Delivered working, deployable end-to-end applications adhering to clean architecture and scalable practices.

PROJECTS

OasisSpace <i>React, Node.js, MongoDB, Groq LLaMA, Google Gemini</i>	Live Demo Code
---	------------------

- Developed a premium real-estate platform featuring role-based access control and integrated Razorpay payments.
- Integrated Groq LLaMA 3.3 to build 'Jarvis', a real-time AI property assistant.
- Utilized Google Gemini to programmatically generate SEO-friendly property descriptions.

BaseMind <i>Next.js, TypeScript, Python, FastAPI, shadcn/ui</i>	Live Demo Code
--	------------------

- Architected an AI SaaS platform tailored for agent management and conversational analytics.
- Built an agent-first information architecture optimized for AI-product teams and generative workflows.
- Implemented RAG-ready knowledge base structures to enable scalable and intelligent data retrieval.
